

# Automated Cutting Equipment

## AUTOMATED CUTTING EQUIPMENT

Whether you are a large plate processor, a job shop or just a hobbyist, Purity Cylinder Gases will match you up with the cutting system that best fits your needs. We offer a full line of oxy/fuel and plasma equipment ranging from the cantilever fixed table designs to the dual sided rack and pinion drive models.

Multicam, C&G Systems, Cleveland Motion Controls, Hypertherm Automation and Thermal Dynamics are just some of the manufacturers we represent.

Does your existing equipment need updating? We can also help you with that. Your outdated machine can be updated with new CNC controls, drive motors, plasma systems and CAD/CAM software.

Let us show you how to increase your productivity. Call us at any of our nine locations in Michigan and northern Indiana.
