## Single Phase Dura-Presses

We have been manufacturing our line of hydraulic presses since the mid 1940's. Offered in 10–50-ton capacities, these presses are built to last. Dake hydraulic presses are ideal for assembly, straightening, fabrication, quality control, maintenance, product testing, bending, forming, punching, and shearing. Every hydraulic press has a frame that is constructed of heavy-duty arc-welded steel and seamless steel cylinders to prevent leaks.

## Arbor Presses

Nobody in the industry offers a wider range of tonnage and sizes in arbor presses than Dake. For strength and durability, all frames are cast iron and incorporate a reinforced spine design which adds rigidity to the press body. The leverweight on the ratcheting lever presses return the lever quickly after down stroke. All frames are machined for maximum stability and drilled to permit bench or pedestal mounting. We have been manufacturing our line of arbor presses in the USA since the 1940's.

## Drill Presses

Our line of industrial strength drill presses are designed with the operator in mind. Access the ability to set up multiple applications quickly with the variable speed option. Choose a bench top or floor model to fit any of your application needs. Backed by the Dake quality you can trust. Your drill press will last for years to come and are guaranteed to get the job done.

## Manual Cold Saws

Our metalworking cold saws are built with rugged construction that's designed specifically to reduce chatter and wear to give you a superior cut on any type of metal. Our manual cold saws are meant for heavy-duty, low production operations and come with one standard HSS blade. All models come with a heavy-duty spindle and gearbox assembly on the inside designed to withstand years of performance without trouble. A mechanical coolant pump with flow control is included.

## Horizontal Bandsaws

No tool takes more abuse than a horizontal bandsaw, and nobody offers more dependable, trouble-free horizontal bandsaws than Dake. Our heavy-duty, double frame construction has been an industry standard since 1941. Since then, our horizontal bandsaws have provided problem-free performance and maintenance-free operation, year after year.
