# Welding without Worries: The new era of SAFE anti-spatters!

The recent EPA ban on methylene chloride has heavily impacted the anti-spatter market. In response, we have taken this opportunity to reevaluate the anti-spatter product offering. Based on our thorough review, we present our top anti-spatter recommendations for three specific applications.

*Economic choice when you need to pinch those pennies!*

## For parts to be painted

**E-WELD 4™:** Walter's premium anti-spatter that guarantees porosity-free welds. Ensures clean welds and eliminates costly rework. Not only saves time and improves part quality, but also provides the best option for parts that will need to be painted.
